

COVID - 19 | Key Indicators

Last Updated: 01-21-21

All dates are based when an indicator is reported and will not match data in other COVID-19 dashboards provided by the Ohio Department of Health. All other dashboards are based on onset date, date of hospitalization, or date of death.

Note: Totals include Confirmed and CDC Expanded Case Definition (Probable)

Department of Health

All 88 Ohio Counties Ranked by Highest Occurrence COVID-19 Cases

The 14-day period used for this table covers data from Jan. 6 to Jan. 19. The data were pulled on Jan. 20 and exclude incarcerated individuals. Shaded counties meet the Centers for Disease Control and Prevention definition of "high incidence" of COVID-19.

Key Measures

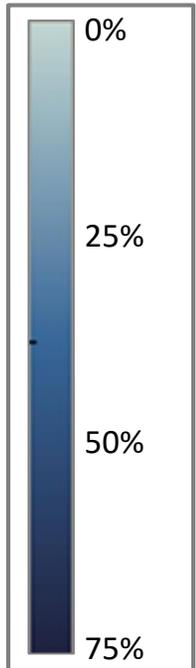

Incidence—Cases per 100,000 Residents Over 2 Weeks

Statewide Average: 619.7

Last Week: 739.8

Regional COVID-19 ICU Utilization

Statewide Average: 25.7%

Last Week: 26.8%

Cases per capita values were pulled on 01/20 for the 14-day period of 01/06 to 01/19 and exclude incarcerated individuals.

ICU utilization is calculated as the percentage of all ICU patients who are COVID positive, as a weekly average for each Hospital Preparedness Region, for the period of 01/13 to 01/19.
