

Just when you thought Dealer Pay's
point-of-sale solutions couldn't get any better...

DMS INTEGRATION

Dealer Pay

Fast. Organized. Secure.

INCREASED
EFFICIENCIES

REDUCED DATA
ENTRY ERRORS

IMPROVED CUSTOMER
SATISFACTION

CONNECTIVITY
BETWEEN
DEPARTMENTS

AUTOMATIC
RECONCILIATION

All of our dealer-specific solutions are designed to help your dealership increase sales and profits, as well as process payments faster and more secure in each department. Now in addition to offering your customers payment flexibility, we have added a way to increase efficiencies even further.

With **DMS Integration**, users in each department will have the ability to **search the DMS in "real time"** for open RO#'s, parts tickets, deal numbers and more. From there, they can quickly select the payment type, card or check (card present, send payment request, key-entered, recurring, etc.).

These new options that tie Dealer Pay to your DMS will reduce steps and data entry/key-stroke errors, as well as ensure the most effective transaction processing available.

And that's not all. Now you can enjoy **Auto Reconciliation!** Dealer Pay will match each transaction to the DMS, and any unmatched items will be shown on an exception report (primarily for refunds or credits) and emailed daily for your convenience.

Set yourself apart from the competition by taking advantage of our complete line-up of services: Dealer Pay POS Plus with DMS, Pay Share and Moves.
